

Table 9: Possibly Extinct and Possibly Extinct in the Wild Species

The number of recent extinctions documented by the Extinct (EX) and Extinct in the Wild (EW) categories on The IUCN Red List is likely to be a significant underestimate, even for well-known taxa such as birds. The tags 'Possibly Extinct' and 'Possibly Extinct in the Wild' have therefore been developed to identify those Critically Endangered species that are, on the balance of evidence, likely to be extinct (or extinct in the wild). These species cannot be listed as EX or EW until their extinction can be confirmed (i.e., until adequate surveys have been carried out and have failed to record the species and local or unconfirmed reports have been investigated and discounted).

All 'Possibly Extinct' and 'Possibly Extinct in the Wild' species on the current IUCN Red List are listed in the table below, along the year each assessment was carried out and, where available, the date each species was last recorded in the wild. Where the last record is an unconfirmed report, last recorded date is noted as "possibly".

The figures presented in Table 9 are for **species only**; all subspecies, varieties and subpopulations flagged as 'Possibly Extinct' (PE) or 'Possibly Extinct in the Wild' (PEW) are excluded from the table. The IUCN Red List website also allows users to search for assessments flagged as PE and PEW (using the check boxes at the bottom of the Advanced search options). Please note that the results of that search includes all taxa (i.e., all species, subspecies, varieties and subpopulations that are flagged as PE or PEW).

Year of Assessment - year the first 'Possibly Extinct' or 'Possibly Extinct in the Wild' assessment was published for the species; some species may have been reassessed since then but have retained their 'Possibly Extinct' or 'Possibly Extinct in the Wild' status.

CR(PE) - Critically Endangered (Possibly Extinct), **CR(PEW)** - Critically Endangered (Possibly Extinct in the Wild),

Scientific name	Common name	IUCN Red List (2020-1) Category	Year of Assessment	Date last recorded in the wild
MAMMALS (Mammalia)				
<i>Bos sauveli</i>	Kouprey	CR(PE)	2008	1969/70
